

Delivering Trusted Expertise & Enrollment Success in Androgenetic Alopecia Research

DelRicht Research combines deep therapeutic expertise with proven operational success across androgenetic alopecia (AGA) trials. Our physician-led network is embedded within diverse communities, enabling rapid enrollment and high-quality data capture across complex and sensitive protocols.

6 Androgenetic Alopecia Trials
in The Past 5 Years

530+ Participants Enrolled
in AGA Studies

8 Sites Nationwide
Experienced in AGA Trials

Why Sponsors Choose DelRicht for Androgenetic Alopecia

Experience Across Indications:

Dermatology trials completed in androgeneic alopecia, vitiligo, psoriasis, acne, HS, eczema, verruca vulgaris, and more.

Diverse Patient Access:

Sites embedded within high-volume physician clinics to access underserved populations, with **45%+ average diversity**.

Proven Performance: DelRicht consistently ranks among the top enrollers in Phase I-IV trials, with demonstrated success in androgenetic alopecia, including **2 trials with study wide FPI** and **7 sites achieving top enroller status** in 6 studies over the past 5 years.

2 

Trials with Study Wide FPI

7 

Trials with Top Enroller Status

Network Capabilities at Scale

Trusted Investigators Nationwide:

Our principal investigators are **experts in androgenetic alopecia trials**, spanning topical therapeutics, diverse demographics, treatment optimization, and safety monitoring.

Access to Priority Cohorts: Our high-volume, embedded sites provide direct **access to high-value androgenetic alopecia cohorts**, including moderate-to-severe, biologic naive, and inadequate responders.

9 

Experienced Investigators

8 Experienced Sites with Full-Service Infrastructure:

Our sites are equipped with access to **local labs, secure IP storage, and specialty care providers**.

Integrated Patient Support for Retention and Compliance: **Dedicated, full-time staff** provide extensive androgenetic alopecia specific education, real-time support, and adherence follow-up.
